**Exclusive carpets for  
your Home & Workplace**

# INTRODUCTION

Jaipur Carpets are all hand knotted, involved incredible number of man hours and high level of concentration. We always use high quality of tools to eliminate any possible error during manufacturing. We are having a team of expert weavers, they always put their 100 percent concentration throughout the weaving process to make every carpet a master piece.

A common feature in virtually all our exclusive carpets is a high knots density, often from Six hundred thousands to million knots per square meters. Many models are knotted in silk. In many of our designs stories and historic events are woven in a beautiful and illustrative manner.

Many of our carpets are considered very exclusive and always enhance the feel of elegance and luxury of the interiors. Our carpets are priceless treasures and carries our cultural heritage.

In addition to a high knot density there are several additional factors that come into play when it comes to classifying them as exclusive. We use finest sheep's wool making the carpet soft and durable. Only Natural Dyes are used in dying of the yarn and the carpets colour combination are chosen carefully to ensure the best possible harmony.

We can also customize these carpets as per customers requirements in Size colour and Design.

Our carpets are available in South Asia, South East Asia, Middle East Africa & North America.

# How A Carpet Is Made...

1

The First Step in the production of a hand-knotted carpet is shearing the wool from the sheep. the finest wool comes from the neck, known as kork wool.

2

After having sheared the sheep, the wool is spun, in this case by hand this is time consuming work, but necessary to achieve the perfect quality yarn.

3

Dyeing the yarn involves it being dipped repeatedly in large dye baths to ensure the colour is even. the dye source is extracted from plants, minerals and insects.

4

After the yarn is dyed, it is important that it is dried thoroughly the colours stabilise in the sun and the yarn is then rolled up into large balls before knotting.

5

Before the knotting work can begin a pattern template is required. this is carefully sketched out on graph paper, where each square represents a knot in the carpet.

6

A Carpet can be knotted by a single person or in a group here on a vertical loom. the knots are beaten down to ensure the carpet pile is compact.

7

Once the carpet has been knotted, it is polished/cut, this is done by hand or machine. the pattern begins to emerge as the pile becomes shorter and more even.

8

During the washing process the carpets are soaked in water. the water, along with any surplus dye and dirt, is then squeezed out several times using special scrapers.

9

Once the carpet has been washed, they are dried in the sun to stabilise the colours. meanwhile, the colours fade slightly, giving the carpet its beautiful hue.

10

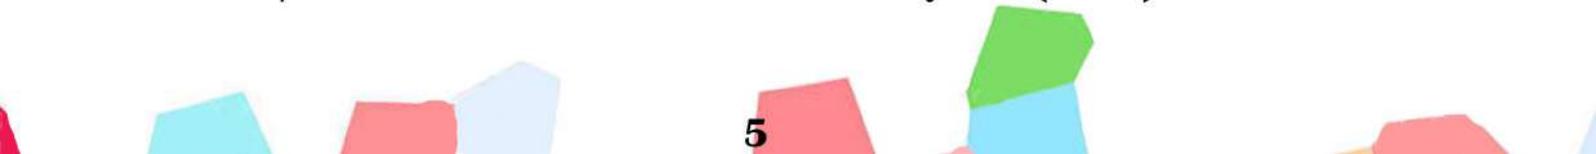

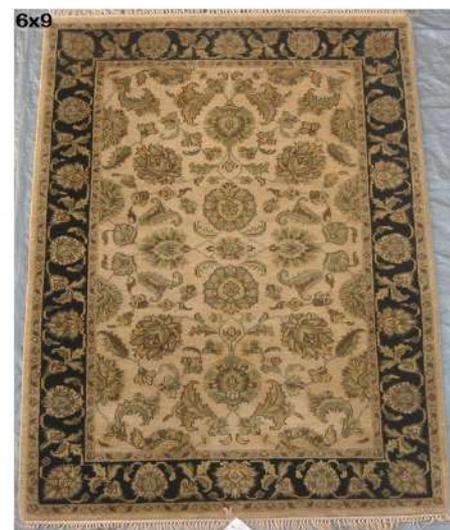

Before the carpet is sold, it is checked thoroughly and small holes that may have come about during post-treatment (washing and cutting) are required.

## **Hand knotted woolen pile carpets**

- **The quality of this product is 9x9 (81 knots per sq. inch)**
- **Warp/Base :- cotton yarn (20%)**
- **Weft/Make :- Hand knotted woolen yarn (80%)**

## Available sizes:-

**2.6x8, 2.6x10, 2.6x12, 3x5, 6x9,

## **Carpets for commercial buildings**

**Carpet adds to the value and appearance of commercial office space. When we choose the right pattern, design and appearance, we find the best carpet covering for the office. Carpet is considered the preferred flooring in reception area, hallways, offices, conference rooms and boardrooms. It enhances the look and feel of professional buildings and adds to the culture of the company.**

**Carpet adds beauty and enhances the appearance. This feeling of making the right choice by the client cannot be overstated and taken for granted.**

**Carpet is a noise reducer. Most companies have open office settings with a large number of people dealing and interacting with each other. Ringing phones and frequent movement of staff within the office environment raises the noise that hinders the efficiency of staff and becomes an obstacle to proper communication. Carpet offers an excellent solution in tackling the loud sounds in the office and helps to increase productivity.**

**Carpet is healthy. When we understand that carpet is the best air filter in the building, we realize the importance of keeping it clean. Carpet is like a kitchen sink, a collector of stuff. Carpet collects air pollutants, dust, allergens and toxins and traps the molecules in its fibers. By regular carpet cleaning we not only keep spots and stains to a minimum, the air is cleaner and staff healthier.**

**Carpet is cost effective. Proper carpet cleaning extends the life cycle of carpet. Contracting with a professional and experienced commercial carpet cleaning company who has consistent great outcomes with commercial contracts, allows you to rest assured that your office carpet is being cleaned with the right system and in the right manner. All carpeted areas must be cleaned on a regular schedule maintenance plan to maintain the highest quality of office appearance.**

**Carpet appearance management is easy to maintain. When scheduling the frequency of carpet cleaning, notice must be observed of foot traffic, outside entry ways. Type and style of fiber, future plans of the office space and budget allowances. Not all areas need cleaning every month, depending on foot traffic, office carpet cleaning can be broken out into a monthly, quarterly and annual program. There are professional ways and systems to keep carpet looking good and uniform all the time.**

**When carpet is the choice for office flooring and decor, carpet maintenance is a fraction of cost of other surface. You will find carpet installed in Corporate Headquarters, Banks, Call Centers, Office Buildings, Government centers, Senior Care Facilities and Hotels for the best use of money and overall satisfaction of staff and clients.**
